HTML & CSS

Data Structure

## PROJECTS

### GROCERY MANAGEMENT SYSTEM

#### *DBMS Project*

Oct 2022 - Jan 2023

The Grocery Management System is a comprehensive web application designed to streamline and optimize the management of a grocery store. Built with HTML, CSS, and on the frontend, it provides an intuitive and user-friendly interface for both store administrators and customers.

Behind the scenes, the backend of the system is powered by PHP, a versatile and powerful scripting language. To efficiently manage and organize data, the system utilizes SQL, a standard relational database management system.

### WOMAN SAFETY APP

#### *Android Project*

March 2023 - Aug 2023

The Woman Safety Android project is a dedicated mobile application aimed at empowering women and enhancing their personal safety. This project utilizes the features and capabilities of Android smartphones to provide a comprehensive safety solution.

The application is designed with the primary goal of ensuring the safety and well-being of women in various situations.
